

BEEBE CREEK
Mendocino CountyField Note

June 27, 1962:

This stream was logged approximately in 1956. The Hollow Tree Lumber Company just completed logging in the headwaters last year. There is severe logging damage. A surprising abundance of young steelhead, nevertheless, occurred throughout the stream. There were also few yearling steelhead 6" to 9" long, seen. Some log jams remain. The stream margins are open and the entire area is in the initial stage of recovery. Erosion is heavy. Bob Ray, forester, has been doing some burning for removal of jams. The drainage is controlled by Hollow Tree Lumber Company. WAE:cd
